Claims

1. An aramid filament yarn provided with a finish comprising > 1.5 wt.% of an
   organic substance with a conductivity of > 4 mS/cm, measured as a 50 wt.%
   finish composition in water at 20° C, having a specific electric resistance of the
   yarn < $2.5.10^4$ Ohm.cm.

2. The aramid filament yarn of claim 1 provided with a finish comprising > 2 wt.% of
   an organic substance with a conductivity of > 30 mS/cm, measured as a 50
   wt.% finish composition in water at 20° C, having a specific electric resistance of
   the yarn < 2.10^3 Ohm.cm.

3. The aramid filament yarn of claim 1 or 2 provided with a finish comprising > 2
   wt.% of an organic substance with a conductivity of > 41 mS/cm, measured as a
   50 wt.% finish composition in water at 20° C, having a specific electric
   resistance of the yarn < 10^3 Ohm.cm.

4. A method of making the yarn of claim 1 having a specific electric resistance of
   the yarn < $2.5.10^4$ Ohm.cm, comprising bringing a solution of an organic
   substance onto the aramid yarn such as to obtain > 1.5 wt.% of the substance
   relative to the total weight of the yarn without the finish, characterized in that the
   organic substance has a conductivity of > 4 mS/cm, measured as a 50 wt.%
   finish composition in water at 20° C.

5. Use of the yarn of any one of claims 1-3 for transporting electric current.

6. Use according to claim 5 for transporting electric current in aramid-containing
   material.

7. Use according to claim 5 for transporting electric current in an elevator cable.

8. Use according to claim 5 for transporting electric current in an elevator cable
   essentially consisting of aramid yarn.

9. A cable essentially consisting of aramid yarn and at least one aramid filament
   yarn provided with a finish comprising > 1.5 wt.% of an organic substance with a
   conductivity of > 4 mS/cm, measured as a 50 wt.% finish composition in water at
   20° C, having a specific electric resistance of the yarn < $2.5.10^4$ Ohm.cm.

10. The cable of claim 9, wherein the cable is an elevator cable.
